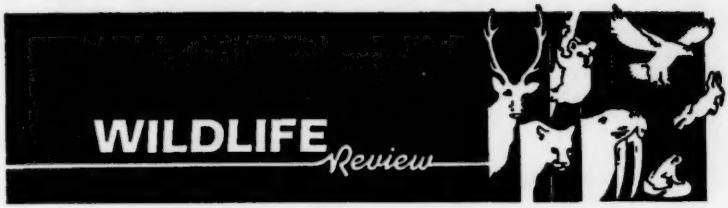
Wildlife Review, published six times per year, serves to alert wildlife biologists to current worldwide wildlife/natural resource literature. Citations are taken selectively from over 1300 journals and periodicals. In addition, reference to more than 500 books and symposia proceedings concerning wildlife and natural resources is included annually. All citations are comprehensively cross-referenced in separate Author, Geographic, Subject, and Systematic Indexes. Authors who publish in journals not screened for ***Wildlife Review*** are encouraged to submit reprints to the Editor.

The U.S. Fish and Wildlife Service assumes no responsibility for the accuracy of material from outside sources.



A current awareness index to wildlife and related literature.

Book Reviews

The African Elephant–Twilight in Eden, by Roger L. DiSilvestro 138

Global Climate Change and Life on Earth, edited by Richard L. Wyman 338

AVAILABILITY OF REPRINTS AND PUBLICATIONS

Wildlife Review **does not distribute any of the papers cited herein, nor can the editor of** ***Wildlife Review*** **obtain copies of these papers for anyone. A reprint of an article published in a journal may be available from the author, from the organization with which the author is affiliated, or from the publisher of the journal in which the article appeared. When an author's address is known, it is shown in square brackets following the citation. Addresses of most wildlife organizations can be obtained from the Conservation Directory, an annual publication available from the National Wildlife Federation, 1412 16th St., N.W., Washington, D.C. 20036. This directory lists more than 900 agencies and organizations concerned with natural resources use.**

Camera-ready copy for this issue of ***Wildlife Review*** **has been generated by computer programs developed by the Data Base Section, U.S. Fish and Wildlife Service, Office of Information Transfer, 1201 Oak Ridge Drive, Suite 200, Fort Collins, CO 80525-5589**

Wildlife Review **Is Now Available On Compact Disc**

BOOK REVIEW

DiSilvestro, Roger L. 1991. *The African Elephant - Twilight in Eden.* John Wiley and Sons, Inc, 605 Third Avenue, New York, NY 10158-0012. 206 pp. Available from the publisher at $34.95 (cloth).

This Audubon Society book combines the easy reading of a traditional coffee table book with a cursory examination of the biology and management of one of Africa's greatest continental resources. DiSilvestro loosely divides the book into four sections: the history of elephants before widespread European settlement in Africa, the historic utilization of elephants since European colonization of Africa, basic biology, and Africa's current elephant management efforts.

Thankfully, the reader is spared voluminous evolutionary accounts and begins the first 2 sections with a thorough overview of the historic roles of elephants in human civilizations. The third section deals primarily with the biology and ecology of elephants. Although written in layman terms, all but the most experienced elephant biologists should find this section enlightening. The ivory trade, from its inception through 1990, is covered in detail in the fourth section. DiSilvestro discusses conservation and management efforts of most ivory producing countries as well as those marketing ivory products. The development of CITES and its implications to African elephant conservation are well covered.

With over 130 color photographs in an oversized (9 1/2 × 12 inch) 206 page book, it is obvious that *The African Elephant - Twilight in Eden* was meant for the coffee table. However, anyone with an interest in Africa or elephants should take the time to also read it. —Michael L. Jennings, U.S. Fish and Wildlife Service, National Ecology Research Center, 4512 McMurry Avenue, Fort Collins, CO 80525.

BOOK REVIEW

Wyman, Richard L. (editor). 1991. *Global Climate Change and Life on Earth.* Routledge, Chapman and Hall, 29 West 35th Street, New York, NY 1006. 282 pp. Available from the publisher at $55.00 (cloth) and $24.95 (paper).

The book has 16 chapters by different authors who are with various conservation agencies, including The World Wildlife Fund, The National Audubon Society, and The Environmental Defense Fund, and from universities and government agencies. A foreword is by Paul R. Ehrlich, Bing Professor of Population Studies at Stanford University. The authors had presented chapter contents at the conference on Global Climate Change and Life on Earth: Evidence, Predictions, and Policy at the New York State Museum in Albany, New York, on April 24 and 25, 1989.

The authors of the first four chapters explain global climate change, identify anthropogenic sources that accelerate it, and review progress in modeling its consequences. The authors of chapters five through 11 describe simulated consequences of global climate change for flora and fauna of various ecosystems. The authors of the remaining chapters present expected consequences of global climate change for humans and address needed policies to stabilize the concentration of greenhouse gases in the atmosphere.

The book is an excellent source of information about its topic for an audience with general as well as higher education.

The discriminate reader will frown about the general and even informal language and about grammatical errors in the text. However, meanings are usually clear and without ambiguities. —E. D. Rockwell, Office of Information Transfer, U.S. Fish and Wildlife Service, 1025 Pennock Place, Suite 212, Fort Collins, CO 80524.

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U. S. administration.
